

Year 1 - Stay at Home

Lesson Objective: To add and subtract one and two digit numbers to 20

ACTIVITY 1

Create a number line.

Write the numbers 0-20 on small pieces of paper. Create a 'number line' by putting the numbers on the ground, in order, with one step in between each number.

ACTIVITY 2

Call out a number, the child moves to that number.

eg. "5"

Then ask them to **add** or **subtract** another number.

eg. "add 2"

The child travels up/down the Number Line to the answer (eg. 7)

Repeat with various numbers, adding and subtracting numbers up to 20.

ACTIVITY 3

Ball skills.

Ask the child to bounce the ball as many times as possible with their right hand.

eg. 10

Ask the child to bounce the ball as many times as they can with their left hand.

eg. 8

Ask the child to add the two scores together, using the number line.

eg. $10+8=18$

Repeat with various ball skill challenges.

eg. Throwing, catching, dribbling, figure of 8, round the waist etc.

Generate numbers, then add and subtract them using the Number Line.
